

/home/pawel/antimicrox
/src/eventhandlerfactory.h

```
graph TD; A["/home/pawel/antimicrox  
/src/eventhandlerfactory.h"] --> B["QObject"]; A --> C["QStringList"];
```

The diagram illustrates a C++ header file's includes. A central box at the top contains the file path `/home/pawel/antimicrox/src/eventhandlerfactory.h`. Two blue arrows originate from the bottom of this box, pointing downwards to two separate boxes. The left box contains the text `QObject` and the right box contains the text `QStringList`, representing the classes being included in the header file.

QObject

QStringList
