

/home/pawel/antimicrox
/src/qtkeymapperbase.h

```
graph TD; A["/home/pawel/antimicrox  
/src/qtkeymapperbase.h"] --> B["QHash"]; A --> C["QObject"];
```

The diagram illustrates a dependency or inheritance relationship. A gray rectangular box at the top contains the file path `/home/pawel/antimicrox/src/qtkeymapperbase.h`. Two blue arrows originate from the bottom center of this box and point downwards to two separate white rectangular boxes. The left box contains the text `QHash` and the right box contains the text `QObject`. This suggests that the header file defines or includes these two classes.

QHash

QObject
