

AdvanceButtonDialogHelper
::onlyRemoveAssignedSlot

AdvanceButtonDialogHelper
::removeAssignedSlot

JoyButton::removeAssignedSlot

```
graph LR; A[AdvanceButtonDialogHelper::onlyRemoveAssignedSlot] --> C[JoyButton::removeAssignedSlot]; B[AdvanceButtonDialogHelper::removeAssignedSlot] --> C;
```

The diagram illustrates two function calls originating from the `AdvanceButtonDialogHelper` class. The top call is `onlyRemoveAssignedSlot`, and the bottom call is `removeAssignedSlot`. Both calls are directed to the `JoyButton::removeAssignedSlot` function, which is represented by a shaded rectangular box on the right. Blue arrows indicate the flow of the calls from the helper functions to the target function.
